

How to restore ASIAIR OS

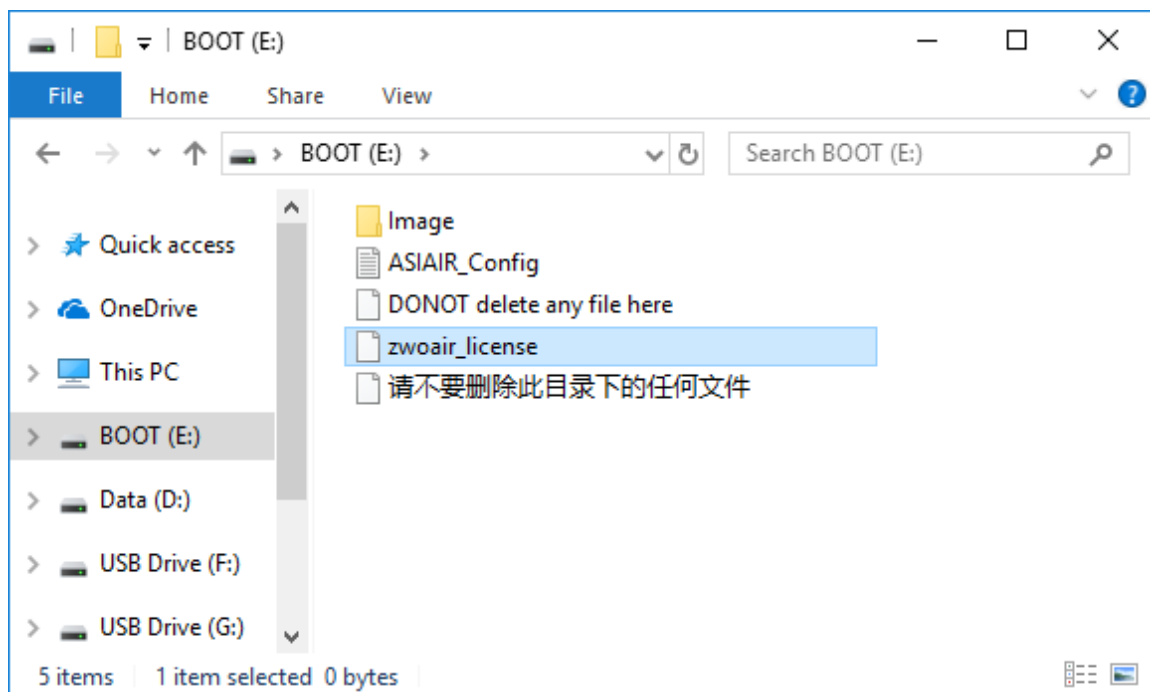

The specific steps to run the ASIAIR OS with a new MircoSD card, **32GB**, *Samsung required*:

Part 1 Preparation

- 1) Download, install the latest version of [Win32 Disk Imager](#).
- 2) Download the ASIAIR system file **ASIAIR_V1.02.zip** from [Google Driver](#), and unzip the **ASIAIR_V1.02.zip**.

Part 2 License file backup

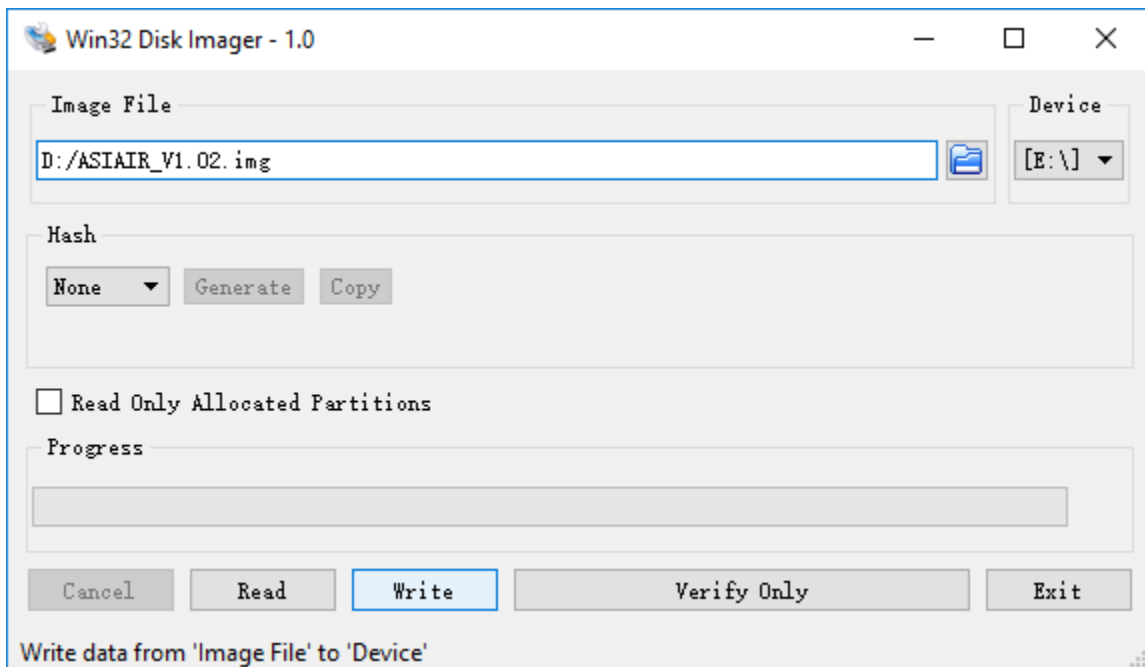

- 3) Back up the license file: **zwoair_license**, the file is on the **BOOT** partition.

* If the MircoSD card is damaged, please send the **SSID** of your ASIAIR to email support@zwoptical.com and we will generate a new license file for you.

Part 3 Restore the ASIAIR OS

- 4) Insert the new MircoSD card into the card reader, then plug the card reader into the computer USB interface.
- 5) Run the Win32 Disk Imager, click  on its interface to select the image file that just unzipped in 2).
- 6) Under the **Device** label of the Win32 Disk Imager software interface, select the TF card drive letter.
- 7) Click  to start. It would take 30 to 40 minutes typically.

- 8) Copy the license file to the **BOOT** partition on the new MircoSD card.

* The MicroSD card looks like:
